Agenda 2 Acknowledgement of the Board of Directors' Annual Report

The Company Secretary informed the Meeting that the Board of Directors' Annual Report covered the operating results of the Company for 2010, and appeared in the 2010 Annual Report, in the Message from the Chairman and the President. The Annual Report, which also featured other information and reports, had been sent to the shareholders together with the Annual General Meeting Notice.

In addition, Mr. Rowan D'Arcy, President & CEO, informed the summary of Results of the Year 2010 to the meeting.

Opinion of the Board of Directors The Board of Directors' Annual Report on the Company's operating results for 2010 should be presented to the Annual General Meeting of Shareholders for acknowledgement.

The Company Secretary informed the Meeting that the Board of Directors would take any questions or suggestions from any shareholders.

Shareholder suggested that overall the net income generated from operating results over the past 3-year period, the company earned a profit of 1.09 Baht per share, accounting 1.28 Baht per share. The SET current transaction price is 19 Baht per share. In respect of market share overall, there is written premium amounted 124,935,636 Baht; consisted of 7,839.26 million Baht fire insurance which the company achieved 490.10 million Baht, 4,324.09 million Baht marine shipping insurance which the company achieved 276.06 million Baht, 8,179.21 million Baht miscellaneous insurance which the company achieved 673.73 million Baht, 74,593.07 million Baht automotive insurance which the company achieved 655.19 million Baht. Is it possible that it moves the company achieving Top 10 within 2-year course for written premium? The No.10 Company currently is Deves Insurance PCL with written premium amounted 3,260.0 million Baht approximately.

Chairman informed that the company can increase market share as desired by shareholders by increasing the marketing commission and decreasing the anxiety of risk simultaneously. However, as the company embraces the progress policy deliberately where stability and long-run achievement has been focused. The company does not only stress an increase in market share as the risk opportunity is high. Based on this policy, the company can pay the shareholders the dividends regularly. The shareholders' recommendation is beneficial and the company promises to move the company toward progress at company's best effort. One effective channel is advertisement which shareholders do not see much the company's public relations and advertisement as compared to other companies that accelerate the public relation activities and advertisement. Advertisement is an attractive point of sales to the company as it's usually employed as tool to increase the market shares. All of these, the company triggers to bring forth the balance increasingly. By this very moment, please Mr. Rowan D'Arcy, President & CEO, informed the shareholders, and has executive probably has different opinion and viewpoints.

President & CEO (Mr. Rowan D'Arcy) informed that in respect of the written premium in which the company has been ranked No.10, the fire assurance has been ranked No.6, meanwhile, the company seeks for additional markets by acquiring the BT Insurance Co.,Ltd, which the company is about to acquire this business. The marine shipping insurance has been ranked No.5 with steadfast increase rate. The miscellaneous insurance has been focused by the company as perceiving that it benefits over industries. The specific markets have been focused that avoids the loss ratio. The miscellaneous insurance covers a wide range of loss and damages. Last year emerged the political turmoil in May; this was considered part of the miscellaneous insurance. Fortunately, the company placed an emphasis to SME customers that the company has not been affected severely. Regarding to automotive insurance, the company attempted to fix the business ratio not exceeding 35%. However, upon deducting the written premium, the insurance premium received by the company was large in proportion. Hence, the company tried to limit the Motor port last year, which last year's loss ratio was 59% approximately. Generally, the motor insurance markets are as high as 60% and many companies may envision the promising insurance premium, yet it's difficult to make profitability. According to past statistics on motor insurance, it was probably 2-3 years profitable, but number of years of loss was greater or equal to that of profits. This is the company's intention that motor

insurance shall be set not exceeding 30%. As shareholders are desirable that the company shall become ranked Top 10, the company currently reaches almost Top 10. In short period of 3-4 months of acquisition of BT Insurance Co.,Ltd., the company gains higher market shares rapidly. Nevertheless, the company desires the controllable growth as acknowledged by shareholders that Thailand-based insurance company growth has been derived from motor insurance largely.

Shareholder enquired about company's strategies on how about the company's investment after becoming a holding company policy.

Managing Director (Mr. Chusak Salee) stated that as informed the shareholders in the previous Annual General Meeting that the company is still a non-life insurance company with limitation on investment and be controlled by the Office of Insurance Commissions (OIC), the company is unable to make investment arbitrarily. After becoming a holding company, the early next year (2012), the company shall be independent out of such investment restrictions unconditionally. The company's policy generally focuses acquiring the business as consulted. The company has overall funds amounted of 5,219.80 million Baht, and the first company acquired is "BT Insurance Co.Ltd" (currently named to Sri Ayudhya General Insurance Co.,Ltd.), Next, the company plans to acquire additional enterprises. However, the company firmly continues to emphasize acquiring the insurance companies, this makes the shareholder perceive the company as a rapidly growing corporation. As status quo, the company's growing step probably will not achieve Top 10 within 2-year course. On contrary, if the company achieves such approach, the company will grow beyond Top 10. The company has still engaged in the insurance business primarily with favorable investment on safer bonds and instruments on one hand, and on the other hand, the company shall make investment in the Stock Exchange of Thailand with control not exceeding to 20% - 30%, otherwise the company may be of the higher risk while about 70% - 75% shall be invested on debt instruments.

Chairman added that Mr.Chusak Salee, Managing Director, placed a primary importance to stability by which it makes some investment in share markets which it's regarded a promising opportunity that the company as holding company exposes the shareholders to experience the productive investors.

Shareholder questioned as operating results improved and investment increased, the doubt was that the share price was 21 Baht in the past, yet at very moment when the executives are foreigner, it's obvious that share price decreases constantly as referred to the past statistics, apparently there are missing amount a great deal, compared to 20-22 Baht per share when the executives are Thais and the variation in price has been relatively constant. Today a share is 18.80 Bath; it's about 15% loss as compared to that Thai national management. Why does the SET index stand at 600 points when executed by Thais despites today it rises up to 1,100 points; the share price is less than that executed by Thai?

Chairman replied the shareholders that if executed by Thai executives and share price are good, it seems unfair to Mr. Rowan D'Arcy as he entered during the SET depression, and if compared to the SET index, it appeared both increase and decrease alternatively. The shareholders bought stock priced 21 Baht a share while today share price is close to 21 Baht, it's anticipated that planned operation which share price is set at 20 Baht will be achieved. In this viewpoint, it should consider the global economics. In Thailand, the stock price varies; increase and decrease, is a dominant factor for price change. To rely on the best price all the time may deem unfair. If the shareholders view many other companies, they could find that in such situation it may encounter failure of dividend payment, but the company did. During 2007-2010, the company paid shareholders the dividends constantly, and be hopeful that Mr.Chusak Salee, Managing Director, can achieve the investment management on his own competency which previously has been restricted and controlled by rules.

The regulations and rules set out by the Office of Insurance Commissions (OIC) will no longer include the restrictions. It's expected that the company can maintain the achieved level of dividend paid to shareholders. These matters are considered the most important thing. It's the Board of Director's resolution that shareholders shall be paid the dividend regularly, and the company ensures to maintain the achievement level in dividend payment. The shareholders should not be worried about this because the promising future

waits with powerful Board of Directors of the company. It is not beyond company's ability that stock price will be higher than 20 Baht one day surely. Mr. Rowan D'Arcy informed that during his entering into management, the book value increases constantly while stock increase or decrease is another issue. In fact, stock varies at any time in relation to the stakeholders' interest. The company continues to maintain the satisfied level of the remuneration, and is likely to increase. Hence, whether foreign or Thai executives, if they are potential to move the company toward growth, certainly it benefits the shareholders.

Shareholder questioned that by the end 2010s, the natural calamity in Southern Thailand causes severe damages, what portion does the company pay for the first quarter of the year 2011, and how much has the company been affected in 2010?. In respect of retuning the non-life insurance license, the company has changed into the holding company after then. Does the company be re-categorized as a "holding company"? Could the company's license be sold?

President & CEO (Mr.Rowan D'Arcy) informed pertaining to the natural catastrophe in Southern Thailand that causes severe damages, the company shall claim against the re-insurance company for amount of 250.0 million Baht. However, following the claim made by the company, it reduces to 19.0 million Baht only. The natural disaster occurred during the first quarter of the year 2010 was inconclusive of the definite figures because claim process has not be completed yet. Some claims occurred in the first quarter while others are managed by April. The subsequent damages in the first quarter were not so severe. Nonetheless, the figures have been processed, overall the damages occurred were less than that occurred at Hat Yai.

Managing Director (Mr.Chusak Salee) described that the business license of the non-life insurance company could not be sold because at the time when the company asked for approval of the OIC regarding to assignment and be assigned with BT Insurance Co.,Ltd, (currently named "Sri Ayudhya General Insurance Co.,Ltd.), it was consented by the OIC hereto, and the company is required to surrender the business license. Thus, we'd like to inform the shareholders that the non-life insurance companies with license have struggled for survival because it requires at least 300 million Baht registered capital to operate the business.

As changed into a holding company, what category is the company to be subjected in the Stock Exchange of Thailand (SET) ? For this case, the company once made a question to the SET, yet it could not provide the exact answer. However, categorization typically is based on company's core earning/business where income is generated.

Initially, the company's core income has been derived from insurance premium, it's expected that the company is likely to be grouped in this category. However, to be sure, it's necessary to inspect with the SET.

Shareholder enquired if the change in category for company shall happen by the end 2011.

Managing Director (Mr.Chusak Salee) addressed that the company has been approved by OIC that the company shall surrender the business license by December 31, 2011, but changing in category in the SET will not occur soon, it's anticipated that it will be executed by the first quarter of 2012.

Shareholders noted that in the past Southern Thailand frequently faced the natural disaster. It occurred once by the end year 2010 and reoccurred in the early 2011. That the company has done the insurance in such affected area, it's possible that the company is more likely to be risk hereof, therefore, how does the company consider?

Managing Director (Mr.Chusak Salee) informed that most of written premium of the company has not derived from Southern clients. The company considers what risks are, and then insurance premium increases accordingly, particularly non-life insurance business which includes re-insurance and insurance for excess of loss the company bought. For examples, Southern flooding causes overall damages to 100 million Baht. The company collects 100 million Baht and at the same time the company also buys the excess of loss valued 10 million Baht and assets and automotive insurance valued 3 million Baht respectively. Despite actual damages is 100 million Baht, with purchase of 10 million Baht excess of loss, the company shall pay only 10 million Baht while a remaining 90 million Baht shall be paid under the

Excess of Loss Agreement by re-insurance company which is ordinary operation undertaken by non-life insurance company. The damages occurred in Southern Thailand included all; automobile, factory, and residence. Nonetheless, it may be suffering to those whose residence was flooded because the fire assurance will not provide the coverage to flooding event. However, in respect of the automobile and factory insurance, it provides coverage in case of flooding. In case of factory insurance, the retention is somewhat less 5-10% or even 1%, suppose the factory insurance is 1,000 million Baht, the retention 1% will be 10 million Baht. In case of several factories, the retention 1% will be higher to 1,000 or 100 million Baht while the company takes accountability amounted 10 million Baht only because the company has the excess of loss.

Shareholder addressed that acquisition of the enterprise seems minor activity, but it's considered a big task to the company like Sri Ayudhya Issuance PCL. On the other hand, the shareholders request higher stock price. If the operating results are promising and stock price is irresponsive, the recovering opportunity is possible, but if the operating results are negative, the higher opportunity of loss would result. We hereby encourage Mr. Rowan D'Arcy, President & CEO, for his administration and effort that is eagerly committed to move the company development. The matter was proposed to the Meeting for acknowledgement.

After consideration the Meeting unanimously resolved to acknowledge the Board of Directors' Annual Report as proposed.
